

THE POWER OF
REDARC

TVMS ROGUE
COMPACT CONTROL.

TVMS ROGUE

At just 25mm thick and with in-built smart fuses, the new TVMS Rogue offers a compact and flexible centralised power control solution for caravan, camper and 4x4 applications.

DIMMABLE AND PHYSICAL SWITCHING.

The perfect solution for controlling and programming on-board lighting, TVMS Rogue allows for lights to be programmed to dim to a preset level.

FLEXIBLE MOUNTING.

With its small footprint, inbuilt electronic fusing and four simple mounting points, the TVMS Rogue offers a compact power control solution that can be mounted out of sight and out of mind.

ANALOGUE SENSING.

TVMS Rogue offers more accurate and granular water tank level measurements thanks to its two analogue tank level inputs, which are compatible with common tank level sensors.

SPECS

	TVMS ROGUE TVMS1240
Power input voltage	9 - 16V
Maximum output current	40A
Output channels	10 x 10A
Sensor inputs	2 configurable analogue inputs
Operating temperature	-20° to 70°C
Storage temperature	-40° to 80°C
Temperature sensors included	No
Weight	430g
Dimensions	250 x 130 x 25mm
